Education

- **University of Illinois Urbana-Champaign (UIUC)** **2024 – Present**
Ph.D. Candidate, Electrical and Computer Engineering; Advisor: [Prof. Svetlana Lazebnik](#)
CGPA: 4.0/4.0
- **Indian Institute of Technology Gandhinagar (IIT-GN)** **2020 – 2024**
B.Tech in Mechanical Engineering with Minor in Computer Science
[Institute Gold Medalist](#); Overall CGPA: 9.1/10; Minor CGPA: 10/10

Interest Areas

Multimodal Representation Learning, VLAs, WAMs, VLMs, Reasoning, Test-Time Scaling

Awards & Achievements

- Awarded the *Dan Vivoli Endowed Fellowship* @ UIUC 2026–2027 for outstanding academic performance.
- Awarded of the *Qualcomm Graduate Award* @ UIUC 2025–2026.
- Awarded the *Dilip and Sandhya Sarwate Graduate Fellowship* @ UIUC 2024–2025, awarded to outstanding incoming graduate students.
- Awarded the scholarship from Thinking Machines to support my research on VLAs.
- Awarded the scholarship from Modal to support my research on VLAs.
- Awarded the [Institute Gold Medal](#) @ IIT Gandhinagar, for the highest CGPA in the discipline.
- Selected for Y Combinator's AI Startup School 2026.
- 1st position out of 200 participants in a ML hackathon organized by SmartSense Consulting Solutions Pvt. Ltd., earning a job offer for the role of ML Engineer II (declined).
- Institute nomination for Pre-Doctoral Research Assistant Program at Microsoft Research, India.
- 1st rank in [Undergraduate Research Showcase '23](#) @ IITGN for work on AI-enabled on-device drones.
- 10/10 GPA for two consecutive semesters (6th & 7th), each comprising rigorous 26-credit course work.
- Awarded *Shastri Indo-Canadian Institute Scholarship* for my research at the University of British Columbia.
- Travel Award from IIT Gandhinagar for attending ACL 2023, Toronto.
- 1st rank in [Hackrush '22](#), the flagship annual machine learning hackathon of IIT Gandhinagar.
- 1st rank in IITGN Summer Project 2021 for building the most efficient NLP classification model.
- 1st rank in the competitive programming contest @ IIT-GN, participated by B.Tech, MTech, and Ph.D.

Research Internships

- **Applied Scientist Intern @ Amazon** (May 26 – Present)
Mentor: [Dr. Soundarya Sundar](#) *Location:* Sunnyvale
Working in the Ring team, developing efficient video tokenization methods for MLLMs to improve long-video understanding by selectively preserving relevant visual tokens. Research paper in progress.
- **ML Research Intern @ Microsoft Research** (May 25 – Mar 26)
Mentor: [Dr. Nebojsa Jojic](#) (*Senior Principal Researcher*) *Location:* Redmond
Built CityNav, an environment for evaluating MLLMs on long-horizon outdoor navigation, and VoP, a method that elicits latent knowledge from MLLMs, achieving SOTA performance on instruction-free navigation [3].
- **ML Research Intern @ University of British Columbia (MITACS GRI)** (May 23 – Aug 23)
Mentor: [Prof. Yankai Cao](#) *Location:* Vancouver
Built a neural-to-video generation framework by learning the joint distribution between video and spike-train (brain activity) that reconstructs mouse behavior directly.
- **NLP Research Intern @ AI Institute, University of South Carolina** (Aug 22 – Feb 24)
Mentor: [Prof. Amit Sheth](#) (*Director of AIISC institute @ UoSC*), [Prof. Amitava Das](#), [Dr. Aman Chadha](#)
Worked on multimodal fact verification for language models, [7, 8]; multitask learning [14]. Also, launched [DeHate](#), a challenge focused on the automatic blurring of offensive segments (De-Factify 3.0 @AAAI'24).

Academic Research Positions

- **Research Assistant, University of Illinois Urbana-Champaign**

(Aug 24 – Present)

Mentor: *Prof. Svetlana Lazebnik, Prof. Unnat Jain, Prof. Heng Ji*

Improved Vision-Language-Action models for robotic Manipulation by aligning action, language, and vision representations [1]. Improved visual grounding in MLLMs through self-correction, guided by internal cross-attention [2]; improved compositional reasoning of MLLMs via joint image-language decomposition [4]; and authored a survey on agentic systems for automating data science workflows [9].

- **Research Assistant, IIT Gandhinagar**

(Nov 21 – May 24)

Mentor: *Prof. Shanmuganathan Raman, Prof. Anirban Dasgupta, Prof. Mayank Singh, Prof. Harish PM*

Worked on diffusion model for image-to-image generation tasks [6], reinforcement learning for control [13], self-supervised and cross-modal representation learning [5], normalizing flow for constrained geometry, density estimation and path-planning [10, 11], and multilingual topic modeling [12].

Industrial Internships

- **ML Intern @ Physical Research Laboratory, ISRO** (Jan 23 – July 23)
Mentor: Prof. Dibyendu Chakrabarty (PI, ISRO Aditya-L1 Mission)
Implemented transformer-based pipeline with Bayesian inference on data from India's maiden solar probe, the Aditya-L1, to predict anomalous geomagnetic storms with uncertainty quantification.
- **ML Intern @ Tata Consultancy Services (TCS Research)** (Oct 22 – April 23)
Mentor: Dr. Manasi Patwardhan
Designed a transformer-based architecture for product copy generation, trained on the FACAD dataset. Fine-tuned BLOOM and ResNet models using the CLIP loss function to enable effective cross-modal learning.
- **AI Intern @ Defense Research and Development Organization (DRDO)** (Jan 22 – Aug 22)
Developed an RL framework using the actor-critic method in a PyBullet environment with simulated physics to learn drone swarm navigation.
- **SDE Intern @ Efcens Systems** (May 22 – Aug 22)
Developed an intelligent network threat detection platform to red-flag anomalies with Sanjeev Kumar, CTO of DELL, and Prasad Malempati, Sr. Manager of Accenture, San Francisco.
